SKILLS

- AWS, GCP
- Kubernetes
- EKS, GKE
- BASH, Yaml, Groovy
- Docker
- CI/CD (Jenkins, Git–Actions)
- SQL, NOSQL
- Maven
- Prometheus, Grafana
- ELK Stack
- Git, Git-Hub
- Terraform
- Ansible
- JIRA

LANGUAGES

English – Professional

Telugu – Native

Hindi – Beginner

CERTIFICATIONS

Associate Cloud Engineer

Professional Cloud Architect

Certificates in GCP's GKE, GCE, and Cloud Run

EDUCATION

Bachelor of Technology

Vignan's Lara Institute of Technology & science, Guntur

2017 - 2020

PROFILE

With 3+ years of specialized experience in DevOps, I have excelled in areas such as CI/CD integration, multi cloud platforms, Docker, Kubernetes, and Ansible automation. My expertise extends to application support and development, with a focus on mission-critical solutions. I am dedicated to aligning technology with organizational objectives, making me a valuable asset to any team or project

EXPERIENCE

Infosys Ltd • Jun 2024 to Present

Westpac • Hyderabad, India

- Provisioned Windows, SQL, and Linux servers using Terraform, cutting setup time by 60% in VMware and AWS.
- Streamlined Terraform configuration checks with Go scripts, ensuring 100% compliance with infrastructure standards.
- Automated server configuration validation using YAML, PowerShell, and Ruby, reducing manual testing by 50%.
- Validated and tested Linux and Windows server features post-deployment to confirm compliance with functional requirements.
- Collaborated with DevOps teams to integrate Terraform-based infrastructure provisioning with CI/CD pipelines for automated testing.
- Prepared test documentation and reports, highlighting infrastructure issues, regression defects, and improvement areas for cloud/on-prem hybrid environments.

Protean eGov Technologies Ltd • JAN 2022—FEB 2024

Open Network for Digital Commerce • Pune, India

- Established and maintained robust CI/CD pipelines for efficient software delivery, utilizing Ansible and scripting to ensure automation and reliability
- Diagnosed and resolved complex application issues, often collaborating closely with end-users and developers.
- Managed applications on Kubernetes and Google Cloud Platform (GCP), overseeing the deployment of 10 sizable Kubernetes clusters across various environments.
- Designed dynamic Grafana dashboards for scalable, code-agnostic monitoring
- Automated GCP infrastructure provisioning using Terraform, managing GCE instances, ALBs, auto-scaling configurations, and Google Cloud Storage Buckets. Additionally, established CI/CD pipelines utilizing Google Cloud Build, Ansible, Docker, and GitHub Actions, seamlessly integrating the Keel operator for Kubernetes Continuous Deployment (CD) deployments.
